Notes:

I visited the site on 12/1/2005 from about 1:30 to 2:00 P.M. I spoke with Mr. Scott Brown of Earth Movers Inc. Earth Movers were performing the remedial activities at the site. Mr. Brown indicated about three truck loads (24 tons/load) of #6 fuel impacted soil would be transported to Sawyer Disposal Services. About one cubic yard or so of impacted soil remained to be loaded at the time of my visit.

According to Mr. Brown the operators at the asphalt batch plant did a good job of containing the spill by placing berms around the spill yesterday.

In my opinion the spill appeared to be appropriately cleaned-up.

Notes:

I spoke with Mr. Bruce Bogenrief of Sawyer Disposal Services on 12/2/2005 via telephone and according to Mr. Bogenrief, 71 tons of #6 fuel oil impacted soils with a Jell-O-like consistency were received for disposal at Sawyer Disposal Services yesterday from Earth Movers Inc.
